Modules

Modules give Super Admins fine-grained control over which system features are available. When a module is set to **Maintenance** or **Disabled**, users with that role see the corresponding message on their dashboard (e.g. Human Resources). Changes here take effect immediately on the next page load for that dashboard.

SUPER ADMIN ONLY

Human Resource Department

Operations

The screenshot shows the 'Operations Dashboard' in a web application. The left sidebar contains navigation links for Overview, Workflows, Reports, Assignments, Clients, Posts, and Duty orders. The main content area is titled 'Dashboard' and includes a sub-header 'Post coverage, field execution, and recent activity for your operations workspace.' Below this is a tabbed interface with 'Operations' selected. The 'At a glance' section displays five key metrics: Active posts (12), Unfilled posts (10), High priority posts (2), Sites covered (12), and Deployed active employees (1). A 'Quick actions' section below provides links to Coverage board, Logistics status, Documentation, and My profile. The 'Recent post activity' section shows a table of the latest post records.

POST	SITE	STATUS	PRIORITY
Test2	Test2	Active	Normal
Test1	Test1	Active	Normal
Test	Test	Active	Normal

Reports UI not yet fixed.

The screenshot shows the 'Client Management' page. It features a search bar and filters for Status, Shift, Sort, and Rows. Below the filters is a table listing client records. The table has columns for selection, ID, Client name, Posts, Contract, Status, and Actions. A single client record is visible with the status 'Active' and actions 'View' and 'Edit'.

Logistics

The screenshot shows the 'Logistics' dashboard for an 'Administrator' user. The dashboard provides an operational overview of requests, inventory, deployments, and reporting. It includes a sidebar with navigation links for Overview, Workflows, Inventory, and Resources. The main content area features a 'Dashboard' section with key metrics and an 'Inventory by category' bar chart.

Dashboard

Operational overview: request through approval, unified inventory, deployments, maintenance, and reporting. Quick actions jump to common tasks; metrics reflect the current registry.

Key metrics

Unified inventory & workflow (mock store).

Metric	Value	Unit/Label
Total assets	0	All categories
Available	0	Ready to deploy
Deployed	0	At posts
Pending requests	0	Draft + pending

Inventory by category

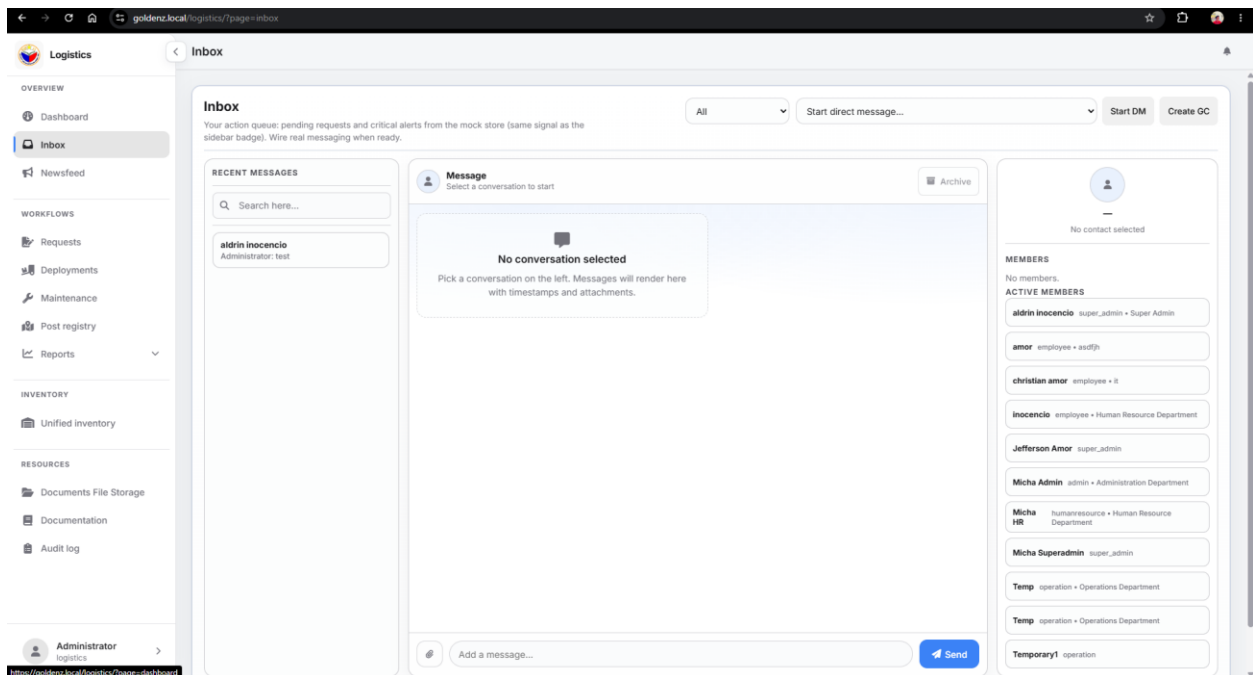

Share of active rows (non-retired) in the unified registry, loaded from database tables.

Category	Count	Percentage
Firearms	0	0 (0%)
IT equipment	3	3 (50%)
Mobile devices	1	1 (17%)
Radio & comms	1	1 (17%)
Office supplies	0	0 (0%)
Vehicles	1	1 (17%)

Deployment per post

Active / overdue deployments by location.

No active deployments.

The screenshot shows the 'Logistics' inbox for an 'Administrator' user. The inbox displays a list of recent messages and a detailed view of a selected message. The right sidebar shows a list of active members.

Inbox

Your action queue: pending requests and critical alerts from the mock store (same signal as the sidebar badge). Wire real messaging when ready.

Developer

The screenshot shows the 'Developer Dashboard' in a web browser. The left sidebar contains a navigation menu with sections: OVERVIEW (Dashboard, Audit Logs), OBSERVABILITY (Logs & Monitoring, Advanced sections), WORKFLOWS (System settings, Modules control), and RESOURCES (System reports). The main content area is titled 'Developer control surface' and includes a summary of technical signals. Below this, there are three main sections: 'System baseline' (Security and runtime checkpoints), 'Recent audit trail' (Latest system write actions), and 'Quick actions' (Direct links for engineering workflows). The user profile 'Administrator' is visible at the bottom left.

The screenshot shows the 'Logs & Monitoring' page in a web browser. The left sidebar is the same as the dashboard. The main content area is titled 'Logs & Monitoring' and includes a 'LIVE SNAPSHOT' button and a 'Refresh data' button. Below this, there is a summary of application audit volume, security signals, and runtime posture. The page is updated as of May 19, 2026, 12:19 AM. The main content area is divided into three sections: 'Application logs', 'Error tracking', and 'Performance metrics'. The user profile 'Administrator' is visible at the bottom left.

Logs & Monitoring

LIVE SNAPSHOT

Refresh data

Application audit volume, security signals, and runtime posture

— backed by the same snapshot as /developer/monitoring-api.php. Advanced operational drill-downs are in the sidebar.

Updated May 19, 2026 12:19 AM

Audit rows (24h): 28

Logistics audit (24h): 0

Security events (24h): 14

Failed login signals (24h): 0

Users in directory: 14

Modules active: 9

Application logs

Structured writes to audit_logs (and logistics tables when enabled). Use audit for per-user trails and CSV export on supported roles.

Grant dev_logs to open the audit UI

Error tracking

Watch failed-login signals and security-prefixed events in the KPI strip. Ship PHP / webserver logs to Sentry, Datadog, or CloudWatch for stack traces and grouping.

Collector not bundled

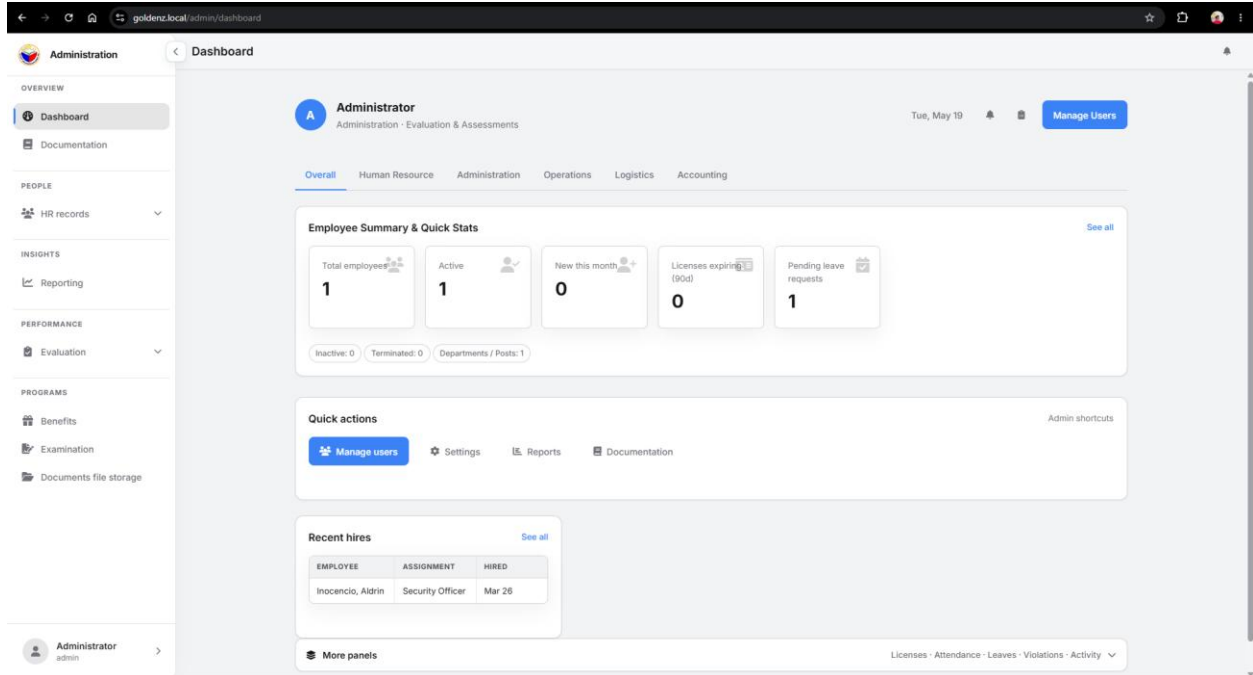

Performance metrics

Memory, disk, and DB latency are captured in each snapshot. Pair with reverse-proxy RED metrics for full request visibility.

System health

Administrator

Admin

The screenshot shows the Admin Dashboard for 'goldenz.local/admin/dashboard'. The left sidebar contains navigation links for Overview, Dashboard, Documentation, People, HR records, Insights, Reporting, Performance, Evaluation, Programs, Benefits, Examination, and Documents file storage. The main content area displays the 'Administrator' profile and a 'Dashboard' tab. The dashboard includes a 'Employee Summary & Quick Stats' section with five cards: Total employees (1), Active (1), New this month (0), Licenses expiring (0), and Pending leave requests (1). Below this is a 'Quick actions' section with links for Manage users, Settings, Reports, and Documentation. The 'Recent hires' section shows a table with one entry: Aldrin Inocencio, Security Officer, hired on Mar 26. The bottom of the dashboard has a 'More panels' section with links for Licenses, Attendance, Leaves, Violations, and Activity.

The screenshot shows the 'Employee list' page for 'goldenz.local/admin/?page=employees'. The left sidebar is the same as the dashboard. The main content area displays the 'Employee list' section with a search bar and filters. The table below shows one employee: Aldrin Inocencio, Security Officer, Probationary, with no license and active status. The table has columns for #, EMPLOYEE INFO, LICENSE / RLM, STATUS, CREATED BY, and ACTIONS.
